

MOZILLA FIREFOX

INTRODUCTION

Most people don't give a second thought to what web browser they use. Mozilla hopes to change that with Firefox, a browser built for privacy, security and speed.

OPEN SOURCE

Firefox is open source software, meaning the code is public and the effort to develop is driven partially by a community of dedicated and passionate users.

NON-PROFIT

Firefox is built by Mozilla, a non-profit organization dedicated to protecting and fostering the development of the open web.

NO SPYING

Mozilla *doesn't* make money from advertising. For users looking to protect their personal data and maximize their online privacy, Firefox is a great alternative to browsers created by companies that do (Google and Microsoft)

FULLY FEATURED

Mozilla is packed with all the features you'd expect from a modern browser, plus more designed to bring you an even higher level of privacy and protection online:

- Ad Blocker
- Tracker Blocker
- Sync Between Devices
- Password Manager
- Uses Less RAM
- Add-ons and Extensions
- Mobile Version
- Mac and PC Compatible
